FILTRATION

Sand filtration

The pump allows water to flow throughout the pool and to go through the filtration system. The sand (natural stone and glass can also serve as filter materials) retains dirt to make the water cleaner.

Our partners

SALT WATER CHLORINE GENERATOR

Simple and efficient, generators work by electrolysis, breaking down the salt in the water into chlorine and sodium. This ensures the daily purification of your pool water.

Minisalt
by Moov

Aquatrol
by Hayward

Our partners

PUMPS

The pump plays a vital role in renewing your pool water as it pushes the water through the filter. Make sure to pick the right one!

ACCESSORY KIT

Our partners

POOL ACCESS

Stairs

The wide surface of each step and the railing make getting in and out of the pool a breeze. What's more, steps are great for sitting down, relaxing and keeping an eye on the children.

Accessories

Cover :
It helps protect your spa from the severe weather, keeps it secure, and helps you save on heating and maintenance costs.

Cover lifter:
By adding a lifter, you will be able to lift your cover without having to remove it.

Steps:
Sturdy and non-slip, allowing you to enter and exit your spa safely. Add a handrail to make access easier for all members of your family.

For maintenance

CALYPSO

PAR/BY
sima

D DISTINCTION

Replacement cartridges (filters):
High-performing and easy to clean, they
effectively filter your water thanks to their high
dirt-holding capacity.
