

# SPEC SHEET

# SOLAR COVER

## SOLAR COVER

### DIMENSIONS

Circular cut for above-ground pools and square cut for oval and inground pools.

### DESCRIPTION

Bubble:

Extrusion method eliminates delamination. One-inch (1") seams are sealed with hot air for increased overall solidity.

Packaging:

Reusable polypropylene bag, which can be used for storage

### CHARACTERISTICS

- Top-quality polyethylene
- 100% new material only
- More transparent
- More durable

### PRODUCTION METHOD

- Plastic extrusion method
- Sealed every four feet
- Best available technology
- Completely automated
- Unique in North America
- Improved durability

### ADVANTAGES

- Keeps water temperature warmer
- Reduces water evaporation
- Considerably reduces evaporation of chemicals

### BENEFITS

- Reduces the cost of chemicals
- Reduces pool-heating energy costs
- Extends the swimming season

### WARRANTY

According to specifications
