Your sima specialist!

Create your own backyard oasis.

Beautifully lit and designed to perfection, classic or modern, we have just the inground pool to make your backyard dreams come true. Say YES to quality and expertise!

**SIMA,
ALL SUMMER LONG!**

PLAN your project

Needs assessment

While your needs may not be the same as those of your neighbours, one thing is true for all: your project must suit your tastes and your budget. Your SIMA specialist will help you assess your needs while taking into account your constraints. You'll appreciate our guidance and unmatched service!

Location, location, location

Before getting started, our specialists will help pinpoint the perfect spot for your project by considering sunlight, the slope of your lot as well as applicable urban planning by-laws.

Access and safety

Buying an inground pool is a big decision. It's best to invest in a high-quality product with proven durability, for peace of mind for years to come. Your SIMA specialist will take the time to advise you on all the practical and safety-related aspects of your purchase.

SPECIALIST advice

Your SIMA retailer specializes in inground pools. Using their extensive expertise and knowledge, they will guide you through each step to bring your dream project to life! They will also advise you on existing regulations in your area, such as enclosure and permit requirements.

**Be bold
and creative**

CHOOSE YOUR design

Thanks to our unique concept, the sky's the limit when it comes to the design and size of your pool. We will assess the depths and shapes that fit your needs and tastes. Waterfalls with rocks, decorative jets, water walls and misting systems are but a few of the features available to make your set-up look and feel amazing.

Popular shapes

L-shaped

Rectangle

Polymer frame

CHOOSE YOUR structure

To help you make an informed choice among the numerous combinations of shapes, sizes and designs, your SIMA specialist will guide you to the pool of your dreams that meets the needs of your family!

Steel

When it comes to strength and durability, steel is definitely where it's at. Galvanization contributes to ensuring the heightened durability of your inground pool, and enhanced reinforcement technologies allow us to steer away from welding during frame assembly. The steel thus maintains its zinc coating and the frame is less vulnerable to rust-related degradation.

Polymer

If you're looking for a frame for salt water systems, look no further! Polymer (expandable resin) inground pools are the best option! They're solid, robust and durable, not to mention resistant to corrosion and oxidation. What's more, because of their composition, these types of pools keep water a few degrees warmer.

Fibreglass

Fibreglass offers a wide range of models, colours and finishes that allow you to highlight certain features while customizing your project. Our manufacturer's unique concept allows you to design your pool according to your specific needs. You can even add an attached spa, a resting space and water features such as waterfalls. Pre-moulded basins, which can include built-in seats, sunbathing areas and steps, make it easy to install additional jets in specific places, for an even more enjoyable experience. They're also quick to install, allowing to speed up your project.

design!**

CUSTOMIZED steps

Take your project to the next level by choosing high-quality ergonomic steps that give your pool a stylish look while meeting your needs. They provide added safety by making it easier to get in and out of the pool. What's trending right now are vinyl-over-steel steps. The steel steps are covered by the pool's liner, thus combining the strength of steel and the comfort of the lining. This allows you to customize your project. The only limit is your imagination! Thermoplastic and acrylic reinforced with fiberglass are also attractive, robust and very resistant materials.

PREMIUM liners

Made according to the industry's highest standards, our liners are made from high-quality vinyl and treated using a special fungicide to prevent bacteria growth. They are designed to resist UV radiation for increased durability.

Always on the cutting edge of emerging trends, we offer a selection of liners that coordinate beautifully with even the most modern pool designs, for a complete backyard look that blends seamlessly with the style of your home.

Liners with plain upper sections are all the rage right now. To give your water a tropical look, choose a liner in shades of beige or natural grey.

MAGNIFICENT sunbathing areas

**Get the most out
of your pool**

Offer yourself an eye-catching sunbathing area that draws attention... and a crowd! This elevated shallow platform offers poolside access and the perfect gathering spot to sit, relax, soak up some rays and cool off. You can even take it up a notch by attaching a spa!

Light up your world

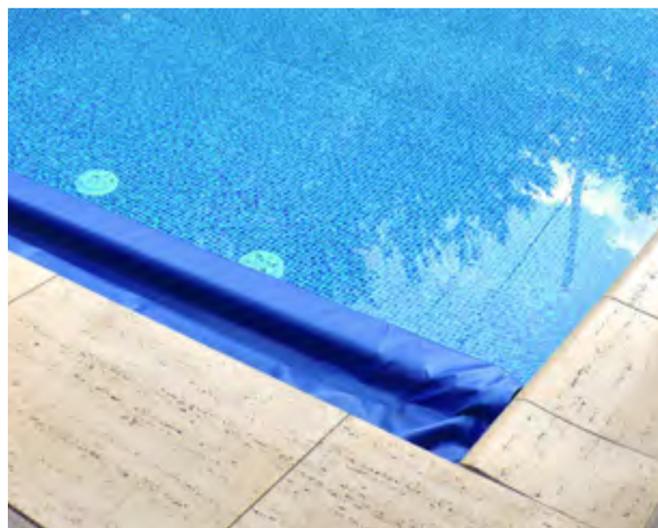

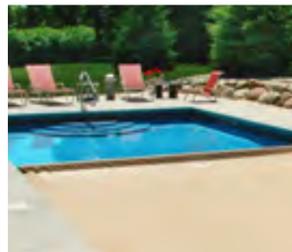

SAFE access

It's now mandatory to install an enclosure around your pool to control access. Our retailers have the know-how to advise you regarding safety. They can offer solutions that are both safe and stylish.

Covers

Automatic covers and winter safety covers are some of the features that can be added to your pool to provide enhanced safety all year round. These customized covers fit your pool perfectly and are made using quality materials. And let's not forget that automatic or solar covers also allow you to save on the cost of heating, water, electricity and chemicals, as they prevent the loss of heat and water through evaporation.

Mood lighting

What better way to wind down a day than poolside? When night falls, transform your backyard into a welcoming, magical space. Add lights all around the pool as well as underwater to create a breathtaking ambiance for blissful summer nights. Your SIMA specialist will help you choose the perfect lighting for your landscaping, water features and pool. You can choose a system with white incandescent lights or coloured LEDs of various shapes. These lights can be synchronized and allow you to create different effects to personalize the mood in your backyard.

Water features

Use water to upgrade the sensory experience created by your pool! Jets, waterfalls and water walls generate natural, relaxing sounds that promote relaxation and inspiration. You can even focus in on the playful side of water for endless entertainment!

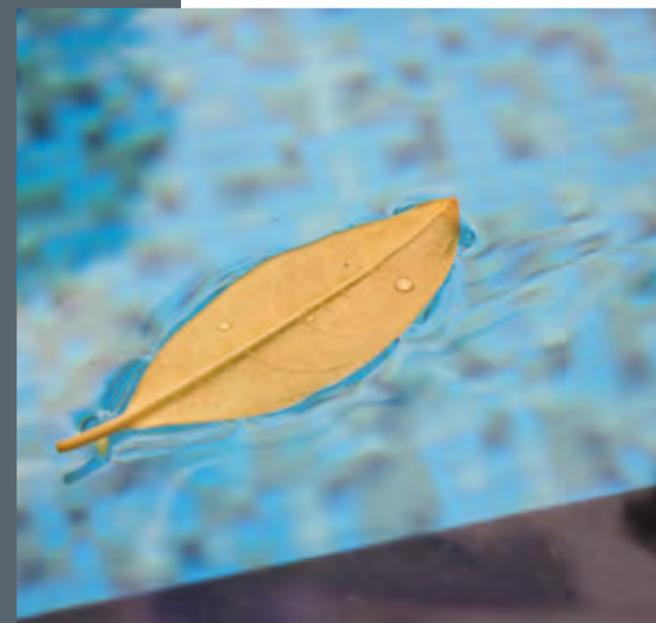

A WELL-DESIGNED **living area**

Borders, walkways and landscaping

Materials such as wood, natural stone, concrete (stamped or not stamped), paving blocks and concrete components can be showcased in a variety of ways to put the perfect finishing touch on your pool and landscaping. Some concrete paving blocks closely resemble natural stone, while some stones are carved to be used as concrete blocks. Not only do these materials serve to retain structures and walkways, they also give a sumptuous look to your set-up. Your SIMA specialist will guide you in choosing finishes and related techniques for your pool. They can also refer you to the right resources and the specialized contractor in order for your backyard to express all the wonders of nature, according to your tastes!

Clean, clear water

The choice of pump and filter is key to keep your water sparkling clean. Many eco-friendly, energy-saving options are available to help you save money while preserving the environment. The sanitation system is also important: choose from a wide selection of salt water systems and UV systems available. To make maintenance a breeze, automated cleaners or robots are just what you need. Visit your SIMA specialist to learn about all the available products.

HEATING stretch out the pool season!

Control the temperature of your water to get the most out of your summer, enjoy a more comfortable experience and stretch out the swimming season. Gas or electric? Heat pumps or solar panels? Look to your SIMA specialist to find the best solution for your needs, budget and environmental concerns. And don't forget the solar cover to maintain the water temperature!

Control at your fingertips!

It's never been easier to have complete control over your backyard set-up. Control systems allow you to easily plan and conduct heating, filtration, lighting and cleaning cycles for your pool. Simply program the system according to your tastes and needs, and let the device do the rest. The keypads and remote controls feature user-friendly digital displays that are easy to read.

Different types of systems allow you to program the water temperature, chlorination and lighting. You can even program water testing and the chemicals to be added. Allow us to guide you in creating a unique resort-style oasis in your own backyard.

Step into the future with systems that allow you to manage your settings using an app on your smart phone or tablet.

The logo for Sima Pools & Spas is centered on a dark blue square. The word "sima" is written in a white, lowercase, cursive script font with a small "TM" trademark symbol to its upper right. Below "sima", the words "POOLS" and "& SPAS" are stacked in a white, uppercase, sans-serif font.
