Our high-tech accessories are innovative and simple and will make your experience even more enjoyable!

SpaTouch3™

Featuring a larger screen and new technology, the SpaTouch3™ is made of quality material, is waterproof and ultra-resistant. Convenient and simple to use, it offers complete control at your fingertips!

UV and Ozone sanitizer

The hygiene of your spa will be optimized and therefore will require less maintenance and less chemical products. When exposed to UV light, ozone is converted into hydrogen peroxide, and then turned into hydroxyl radicals, which are more efficient and powerful than hydrogen peroxide and chlorine.

WiFi management system

The ControlMySpa smartphone app (Android™ or iPhone®) allows you to control your spa from anywhere. You can start up the pumps, set the temperature, turn on the lights, program the filtration cycle, etc. Your spa is ready when you are!

Max Air seat

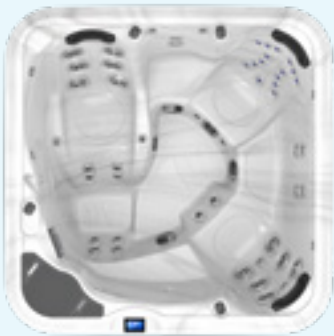

Our therapeutic spas, with a section featuring Max Air technology, are perfect for soothing neck, shoulder and hip muscles, while promoting relaxation and reducing stress. Max Air is a three-jet therapeutic system. First, Trinetic provides targeted care for problem areas. Second, Polynetic is a strong yet balanced jet perfect for wrists, joints and sensitive muscles. Third, Binetic is a double jet providing a therapeutic effect over larger areas.
