

New generation salt system for pools

3 years

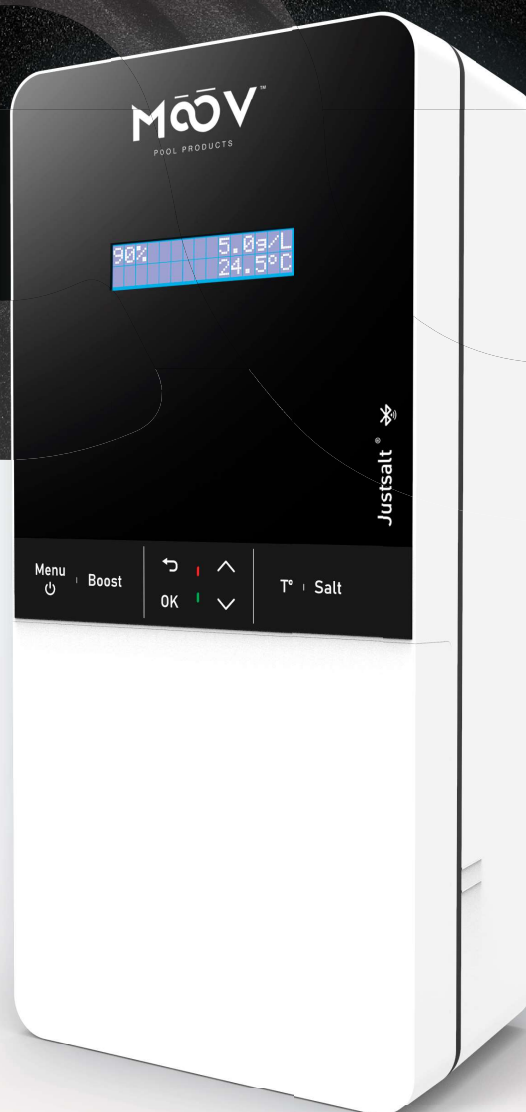

Warranty on the cell
and the system

Real time data

Temperature, salt level, cell life
and pH level*.

Hybrid Mode

Low salt 1500 ppm
Normal salt 3000 ppm

Why salt ?

Pool maintenance simplified! The salt system is a more ecological, safer and offer a completely independent solution for maintaining the quality of your pool water.

Salt (NaCl) is composed of two molecules: Sodium (Na) and Chlorine (Cl). The electrolysis creates chlorine, algae and other unwanted particles. The sodium gives your water a salty taste and keep it softer for your eyes.

Accessory Holder

The Justsalt system has an accessory holder to capture all the data about your pool.

- Salt Sensor: Allow you to monitor your real pool salt concentration.
- Temperature sensor: Provides an accurate reading of your water temperature.
- Grounding Anode: Provides an additional protection against corrosion.
- pH sensor (optional): Read the pH of your pool in real time.

The Cell

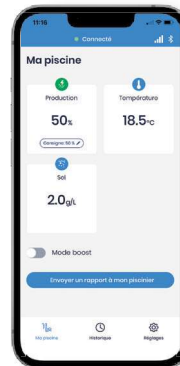

Real time cell life. Our system is able to give the exact remaining life time of your cell. No more unexpected surprises!

Warranty

The Justsalt offers you a 3-year warranty on the system and the cell.

Hybrid

Whether you prefer to operate in Normal Salt (3000 ppm) or Low Salt (1500 ppm), the Justsalt is a hybrid system that allows you to operate in both settings.

Bluetooth

Download the ePool application to control your system remotely. The system will record the last 6 months of data from your system to ensure accurate diagnostic of your pool.

Moov Justsalt	MC50JUST	MC85JUST	MC130JUST
Recommended volume NS (liter/gallon)	50 000/15 000	85 000/25 000	140 000/40 000
Recommended volume LS (liter/gallon)	40 000/10 000	65 000/17 000	93 000/25 000
