

Properly maintaining your pool water is essential. The good news is that it is easier than you might think! Effective and simple to use, CALYPSO pool chemicals help you to achieve and maintain healthy, balanced and clear water throughout the swimming season.

Our products are designed by a Canadian company with recognized expertise in the pool and spa industry. They are visually easy to recognize thanks to the colors of the categories.

ALGAECIDE

Adding an algaecide will keep your pool water algae-free without the need for superchlorination.

SALT WATER

Use these products to maintain the quality of your salt water. These products are specifically designed for salt water and will offer the best results. They will also help extend the life of your equipment.

SANITIZERS

Adding a sanitizer on a daily or weekly basis will eliminate bacteria and algae to keep your water clear and healthy.

OPENING AND CLOSING

All-in-one kit to open or close the pool quickly and easy to use.

SOLUTION

Use these products to correct specific problems such as cloudy water, foaming, metals or phosphates.

BALANCE

Well-balanced water protects your equipment, provides comfortable water for swimmers and helps your sanitizer to perform well. After opening your pool, always check and adjust the following water parameters each week: pH, alkalinity and hardness.

ALL-IN-ONE KIT

All-in-one kit to use once a week for effortless maintenance, and one-step problem solving kits.

Maintaining your pool is simple!

By following these few steps, you will enjoy beautiful, crystal clear water all season long that will make your neighbors jealous!
