FILTRATION

Filters

These compact, energy-efficient systems are designed to remove solid suspended particles from pool water. They feature top-performing technology commonly used in residential filtration systems. Cleaning does not require a backwash. In other words, you save on water treatment chemicals and heating costs.

Sand filtration

The pump allows water to flow throughout the pool and to go through the filtration system. The sand (natural stone and glass can also serve as filter materials) retains dirt to make the water cleaner.

PUMPS

The pump plays a vital role in renewing your pool water as it pushes the water through the filter. Make sure to pick the right one!

1S

One-speed pumps

They are the most economical to purchase and offer performance year after year.

2S

2-speed pumps

These pumps run on high or low speed. Also, they are quiet and allow for energy savings of up to 70%.

PG

Programmable 2-speed pumps

Digital controls allow you to program the pump so that it switches between high and low speed during the day.

HEATING

Heat pumps allow you to extend your pool season from earlier in the spring to later in the fall. You're able to get the most out of your summer! Among all types of heating system, heat pumps are the most energy efficient as they consume only a little bit of energy to produce heat.

Even more with the INVERTER technology

Quiet and energy efficient, heat pumps with INVERTER technology (also known as variable speed) maintain an ideal water temperature while ensuring 50% higher energy efficient than traditional heat pumps. When turned on, they start from zero and gradually increase to a higher speed. This produces a stable current and reduces energy consumption. These heat pumps are also designed to work in low temperatures.

OUR PARTNERS

POOL ACCESS

Swimming is even more enjoyable when your pool features a safe, convenient access. Choose the right equipment for your needs.

Stairs

The wide surface of each step and the railing make getting in and out of the pool a breeze. What's more, steps are great for sitting down, relaxing and keeping an eye on the children.

Ladders

An exterior ladder with an automatic locking door allows you to secure the pool and prevent unsupervised access by children

OUR PARTNERS

PURIFICATION

Salt water chlorine generator

Simple and efficient, generators work by electrolysis, breaking down the salt in the water into chlorine and sodium. This ensures the daily purification of your pool water.

Minisalt

UV technology

When water passes in front of the lamp, the microorganisms it contains are eliminated: 99% of bacteria and viruses are eliminated. This is a safe automatic treatment to be used in combination with your main purification system.

SOLAR BLANKET

In addition to keeping the heat, solar liners limit water evaporation and reduce the need for chemicals.

WINTER COVER

Made of UV high density polyethylene, winter covers are lightweight, easy to handle and install. They extend life of the printed pool liner.

POOL LINERS

The finishing touch!

Our liners are chosen according to the highest industry standards. Installation is a meticulous job best left to professionals. Stop by your local SIMA dealer to see all the designs available.

Made in Quebec, AquaFab is known for its premium quality vinyl measuring 16 thousandths of an inch thick, for both the walls and the bottom. Each liner undergoes a rigorous quality control process that guarantees an exceptional product. AquaFab, advanced technology combined with Quebec know-how!

latham

Ultra Seam technology

Most liners have visible joints along the ground that don't always look so great. Our exclusive manufacturing process allows for stronger joints that are practically invisible.

THE GIBRALTAR LINER

Gibraltar's premium vinyl liner is designed to be UV resistant to reduce damage that can be caused by the sun and ensure the liners stand up to the rigors of the weather, year after year.

Specifications

- Excellent cold crack resistance
- Extra heavy-duty, 100% virgin vinyl material
- Treated vinyl that protect against chemicals and UV fading
- Available in round 52" beaded version
- Thickness of 16 mil wall and the bottom
